If the Colonists want the Negroes and *gens de couleur* to count as men, let them enfranchise them first; that all may be electors, that all may be elected. If not, we beg them to observe that in proportioning the number of deputies to the population of France, we have taken into consideration neither the number of our horses nor that of our mules."

Haitian Revolution: Causes

Carolyn Fick, "French Rev. in St. Domingue" (1997): "It can be argued therefore that the abolition of slavery in Saint Domingue resulted from a combination of mutually reinforcing factors that fell into place at a particular historical juncture. No single factor or even combination of factorsincluding the beginning of the French Revolution with its catalytic ideology of equality and liberty, the colonial revolt of the planters and the free coloreds, the context of imperial warfare, and the obtrusive role of a revolutionary abolitionist as civil commissioner—warranted the termination of slavery in Saint Domingue in the absence of independent, militarily organized slave rebellion . . . [Note for pdf: the next 7 slides, correspond to righthand list, not shown]

1. Demographic "revolution"

- Surplus population: due to drop in death rate -- why? (causes...)
- 1720-1750 in England:
 - · 30 years of top harvests: surplus food
 - no need to slaughter animals each winter
 - more fertilizer more intensive agriculture possibility of breeding animals
- Innovations in agriculture
 - · crop rotation, enclosure, water meadows

2. Fuel crisis (energy)

- More people -> wood shortage
- Switch to coal (coke=purified coal)
 - allows for higher quality iron
 - need tools to mine more
- smelting of iron
 - need to mine even more coal
 - need better tools (iron ones, machines)

3. Surplus money

- good harvests

 Presbyterians
 - prosperity=sign of God's grace (not a sin)
 - living for the here and now -> education in practical things
 - work ethic
 - do not consume all

5. mindset -> info (technology)

- Abraham Darby (1678-1717)
 - used **coke** to smelt copper, then iron (1708)
 - Coalbrookdale (near low-sulphur coal)
 - 1729 wheels, 1767 rails, 1779 bridge
- 1712 Newcomen engine; 1764 James Watt
